

Partnerships at work across California's landscapes

INFORMING AND PROMOTING INTEGRATED SCIENCE, NATURAL RESOURCE
MANAGEMENT & CONSERVATION TO ADDRESS IMPACTS OF CLIMATE
CHANGE AND OTHER STRESSORS WITHIN & ACROSS ECOSYSTEMS

Up and running

WE HAVE STAFF, A STEERING COMMITTEE, SUBCOMMITTEES, PURPOSE AND GOALS

A 15 member Steering Committee made up of agencies, non-governmental organizations, landowners and other entities is developing common conservation objectives across the landscape. Three subcommittees are working on strategic planning, science and communications.

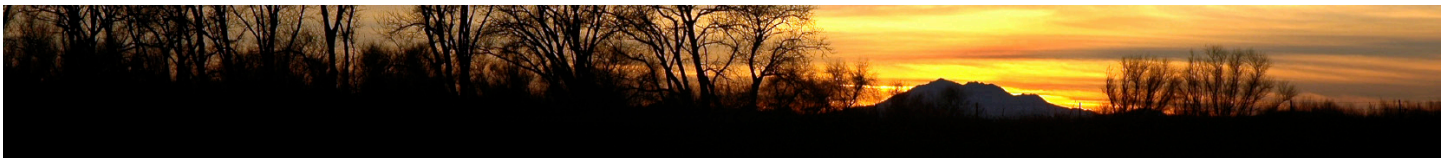

We're adding partners

AND MEETING THROUGHOUT THE REGION

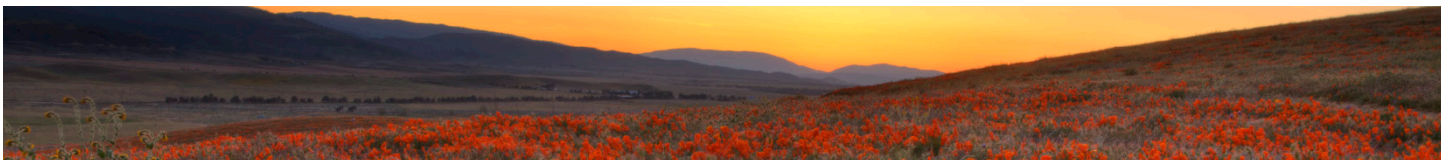

California LCC will conduct workshops to bring managers and scientists together.

With partner involvement, California LCC will develop a Strategic Plan that directs activities over the next five years.

Projects are underway

- Analyzing downscaled global model data to identify potential effects of climate change
- Assessing vulnerability of sensitive habitats and species
- Evaluating the effects of global climate change and sea level rise on estuarine intertidal habitats
- Creating new online decision support tools and web-based mapping tools for decision makers

Goals for 2012

- Conduct forums to exchange our science information
- Direct and fund science priorities
- Fully staff CA LCC and integrate work with existing partnerships
