- Goals
- Science Needs
- Structure

California LCC -2010

Purpose Statement

The CA LCC is a management-science partnership informing and promoting integrated science, natural resource management and conservation to address impacts of climate change and other stressors within and across ecosystems.

California LCC -2010

Goals

- Foster collaboration and integration of science and management.
- Support research, monitoring, and the development of technical products to inform and enhance conservation decisions and actions.
- Facilitate information acquisition, interpretation, translation, exchange and availability.

California LCC -2010

Goals

- Promote adaptive management strategies.
- Communicate information, findings, activities, and opportunities within and outside the LCC community.

California LCC -2010

Other Accomplishments

- **Cooperative Agreement with Center for Collaborative Policy**
- **Developed an informational website**
- **Identified 2010 Science Priorities and funded 11 projects**
